Subject: Lost records

REQUEST

Under the Freedom of Information Act can I ask for the following information:

1. Over the last four years how many medical records went missing? Can I have that data broken down by year.
2. How many incidents was this? Can I have that data broken down by year.
3. As a result of these lost records how many procedures were a) delayed/postponed b) cancelled. Can I have that data broken down by year.
4. What procedures were a) delayed/postponed b) cancelled. Can I have that data broken down by year.

I would like all this data by calendar years please.

RESPONSE

The Trust implemented an electronic document management system in 2008 and all health records required for hospital attendances i.e. outpatient, day cases and inpatient including emergency admissions, have been scanned and are available to all Health Professionals and other authorised users at any time, in any location on all PCs linked to the Trust network. As a result of all our medical records being electronic the questions are above are not applicable.
