Subject: Water Hygiene

REQUEST

This request relates specifically to water hygiene and the measures taken to prevent infection from waterborne pathogens.

Can you please advise the number of point of use filters used per annum by the trust to prevent waterborne bacteria exiting the water system?

Ideally a breakdown giving the number of filters used in 2014, 2015 and 2016. However if only approximate annual usage figures are available then this will be adequate for our purpose.

RESPONSE

24 per annum for the last 3 years.
