Subject: Forearm fractures in adults and children

REQUEST

I am interested in your trust guidelines regarding the treatment of forearm fractures in adults and children, and I have created surveys on this topic.

Please complete surveys

Also, I would be grateful if you could send your trust guidelines for distal radius fracture / paediatric forearm fracture, if you do indeed have one.

If your trust manages multiple hospitals, please could a survey be completed for each hospital that manages distal radius fractures?

RESPONSE

Please see attached.
