Subject: Data Quality

## REQUEST

Please can you provide me with information by answering the following questions and any additional information will be greatly appreciated in regards to Data Quality in your trust?

1. What has been the impact of poor Data Quality on the Trust?
2. Are you able to quantify the state of Data Quality?
3. Are you able to quantify any losses down to poor Data Quality and, if so, what has been the loss in the last 3 years including litigation, fines, admin and overhead costs?
4. How many CQUIN payments or other compliance payments have you missed because of data quality?
5. What processes does the trust have to manage data quality?

## RESPONSE

The Trust considers this request too vague and as a result is unable to respond appropriately. If you wish to refine your request we will happily consider it.

However we can confirm that we have not missed any CQUIN or Compliance penalties due to Data Quality”
