REQUEST & RESPONSE

I am currently conducting research into the costs associated with ciclosporin use in dermatology patients. With this in mind I was wondering if you were able to email me the cost per patient to your hospital (actual hospital costs not the way in which it may be charged to commissioners) for conducting the following tests:

Test	Cost Per Patient
Full blood count	£2.20
Urea & electrolytes	£1
Liver function test	£1
Serum creatinine	25p
Creatinine clearance	50p
Radioisotope Glomerular Filtration Rate	NA
Gamma-glutamyl transpeptidase (GTT);	25p
Lipid profile	25p (this is a standard price here for a "screen" lipid profile - it would be much more if needed electrophoresis/genetic work up)
Fasting glucose test;	25p
Urine test for proteinuria;	25p (possibly more if they mean stick)
Urine test for infection	£4.93
Tuberculosis test	£56.00
Chest X-ray	£25
Smear test;	NA
Pregnancy test	£1
