From: Commercial
Date: 23/04/14
Subject: Clinical software systems

REQUEST

For each hospital within your trust, could you please provide a list of clinical software and management systems in operation including software title, vendor name and year of installation?

For each listing item, could you please indicate whether there are any replacement plans, and if yes, which software title was chosen as a replacement, what the name of the vendor for that replacement title is and when you are expecting to go live with each replacement system. Where a replacement is planned but no information is available, please state why it isn't available.

Where possible, would you please supply this information by department; if this is not possible then I will be happy to receive the information in whatever other form of organisation you deem reasonable or if necessary as an unordered list. Furthermore, if possible, would you please supply the information as a list in Microsoft Excel or in csv format; if this is not possible then I will be happy to accept the information in any other common digital format or if necessary on paper. If any of the information is already published and available as an internet resource then it is sufficient to point me to that resource.

RESPONSE

Title	Category	Vendor	Replace in next 12 Months
Maxims ADT	Admissions, Discharge and Transfers	IMS	No
BloodTrack	Database	Neoteric	No
Costmaster	Finance	Civica	No
