## REQUEST

I am hoping you can help find out the following information. I believe that the St Helens and Knowsley teaching Hospitals NHS Foundation Trust is using Patientrack the active safety and communication system . If this is correct, please can you tell me how much you are paying for the technology, along with any implementation fees and maintenance and how long the license is to use it?

## RESPONSE

The Trust is currently in a procurement process with a supplier sourcing Patientrak. No further details can be provided until the procurement is complete.
