Subject: Compensation for Data Loss Incidents

REQUEST

Q1.—Can you provide me with details of data loss incidents which have resulted in service users or staff making claims for compensation for loss of their personal data? To be clear I am not asking for details of ICO action taken against your organisation but action brought by service users or staff seeking the *Right to an effective judicial remedy / Right to compensation and liability under General Data Protection Regulation ('GDPR') Articles 79 & 82*. Can you provide details of all claims made including those still unsettled? The detail I require should include a description of the data loss incident and how much compensation was paid to the data subject(s) in each case.

I just wanted to confirm the time period, as the GDPR came into effect in May 2018 can I request the data from that date please.
