Subject: Diagnostic tests and Biomarkers

## REQUEST

We are developing an online resource for cancer patients which aims to help people learn more about the hospitals in their area.

We have gathered lots of data regarding hospitals in English trusts, and we are now expanding the site into other areas, including haematological cancers. I thought it would be useful to get in touch to see if you'd be able to help me pull together some information about the hospitals in St Helens and Knowsley Hospitals NHS Trust.

Part of the website will show patients which diagnostic tests (and therefore biomarkers) are used/available at each hospital. I have attached a list of the available tests and biomarkers, but it would be incredibly helpful if you could let me know which are available at which hospital throughout St Helens and Knowsley Hospitals NHS Trust.

I hope you're able to help me with the above – we hope that the site will be a useful resource for patients. If you would like to see the beta version of the site you can find it here: <https://www.informed-patients.com/#/search>

## RESPONSE

The tests offered by the Pathology Department at Whiston Hospital as part of St. Helens and Knowsley Teaching Hospitals NHS Trust are indicated with a 'Yes' response in the attached Excel spread sheets.
