Subject: Sanitary products policy

REQUEST & RESPONSE

1. Does your Trust have a policy on providing sanitary products during menstruation, for free, to inpatients in hospitals/clinics?

No

2. If yes, can you please provide me with copies of this policy and any relevant documentation relating to how it this policy is implemented?

Not applicable

3. Can you provide details of what happens if a patient runs short of sanitary products during a hospital stay? Is there a process by which the hospital/clinic in question will provide these products – if yes, please provide full details of what the process is.

Clinical areas carry a small supply of products for use if patients run out or require them at short notice.

Some parts of the request may be easier to answer than others. Should this be the case, please release information as soon as possible.

I would prefer to receive the information electronically.
