REQUEST

My name is Yasmin Fowler and I am a medical student at the University of Cambridge. I was recently reading an article published by NHS Digital regarding the interoperability of electronic patient record systems which left me wondering whether the structure of the IT Department of an NHS Trust might have an effect on the success of the EPR system implemented.

If you could please take a few moments to answer the questions as attached in the EXCEL File, that would be greatly appreciated.

RESPONSE

The IT department has 80 staff, providing a shared service to the Trust and other partner organisations and customers
